11 January 1985

25X1

Deputy Director for  
Science and Technology  
Room 6E45, Headquarters

As indicated in the attached messages, the first of our two projected units in Europe (the Press Monitoring Unit [Redacted]) has now been approved by the U.S. Ambassador to Belgium. This means all Agency and State Dept. approvals [Redacted] are in and we can begin establishment. At the next FBIS Biweekly with the DDS&T, we'll demonstrate how to utilize foreign data bases at such an installation. We are also in touch with Rome regarding the establishment of the unit in Milan. Both are one-person units, included in the FY 85 budget.
